# Push Plate Wrap

Powered by **Microbic™**

Puretouch® is a self-adhesive antimicrobial surface wrap. The active ingredient is Microbic™ AMS001.

This self-adhesive push plate is 75 x 345mm this is 75mm wide and is the same width as the most common stainless steel push plates. The easy to apply surfaces are a high quality composite fabric which is durable and soft to touch. The clear Puretouch® graphics provides a clear message to everyone that this is a safe to touch surface. The surface should be washed or wiped with regular cleaners and will last approximately 90 days depending on traffic. When it's time to replace, just peel off and stick on a new one.

Product Code	PT03
Pack Size	25
